

TIPS TO DECIDE

Category Name: RO Water Plant And Sewage Treatment Plant (STP)

Basic Purpose: Better filtration techniques and optimisation of usage of water. Processing and treatment of wastewater.	
Points to remember while purchase 1) Testing of Water sample and inspection of site is a must. A laboratory report is required. 2) From where are the products procured? (Note: Only few vendors have inhouse products and the rest of the items are procured) 3) General brands used for implementation of RO water plant. (Note: a good way to check the brands used by the vendor)	General Price Range: It varies with number of litres/ plant and in general 200 litre plant- 1.5 lakh- 2 lakh
Caution: 1) Vendors might recommend plant is compulsory, when it is not required. 2) Materials of plant will be flawed. 3) In STP required yield will not come and required monitoring of water and quality and output will not be maintained	Areas Of Application: RO Water Plant: Hostels and different blocks in colleges and canteens. For STP: Restrooms outlets
